

For UW-River Falls Class, Summer Means Studying An Icy Telescope

This summer, KSTF Senior Fellow [Katey Shirey](#) is introducing high school students to engineering design as an Upward Bound instructor at the University of Wisconsin-River Falls. The Upward Bound students are studying the science, math and engineering concepts that underpin one of the world's largest and most remote experiments—[IceCube](#)—which is conducted at the South Pole. Shirey, who was previously involved with the project, was quoted in a recent Milwaukee-Wisconsin Journal Sentinel article about UW-River Fall's Upward Bound program. Read the [article](#) now.
